The Problem We're Solving

40% of US food goes to waste while home cooks struggle with:

Fragmented meal planning **across multiple** 📱 **apps**

Recipe sites **cluttered** 🕸 **with ads** and navigation traps

Kitchen anxiety leading to **16K+ cooking** 🔥 **fires annually**

Rising **delivery** 📦 **costs** forcing families back into home cooking

Minimal guidance **?** for **using ingredients** they already have

Lack of accessible, step by step cooking **education** 🎓 **for beginners**

Community 🏠 **kitchen and physical amenities** that go unused

🚫 No one has figured out **“from basket to plate”** yet

The Result: Families losing culinary tradition and connection

Why We Will Win

PorkChop is the only one making “Basket to Plate” a reality

Recipe apps solve discovery but ignore what's in your kitchen

Meal Kits create waste and limit creativity

AI tools lack context and community connection

Smart kitchen devices require expensive hardware

PorkChop uniquely combines:

Proprietary **pantry scanning technology**

Local market algorithm matched with **partnership flexibility**

Human-vetted chef education armed with AI deliverables

Multi-revenue model **reducing customer acquisition costs**

The Best Part: Our culinary companion is there every step of the way

Competitive Landscape

Only PorkChop delivers the complete culinary ecosystem
